Abstract of **JP 8314827 (A)**

PURPOSE: To transfer electronic mail to the constitutive member of a group corresponding to its attribute such as the degree of importance of the electronic mail. **CONSTITUTION:** When an electronic mail is received, its contents are recorded in an external storage device, next, the user of the transfer destination is decided from the judged result of an importance degree judging part 4 for judging the degree of importance from the attribute of electronic mail while referring to a transfer user definition list 6 and a transfer user selecting system definition list 9, and the electronic mail is transmitted. Further, the electronic mail is registered on a non-received transfer mail list 10 based on a transfer user selecting system, retransfer time and the definition of retransfer time of a number-of-times definition list 9. When the reception confirmation of the transferred electronic mail is returned, the registration of transfer mail on the non-received transfer mail list 10 is erased. Besides, after the lapse of a fixed time, the processing of retransfer is performed corresponding to the date and time of retransfer of non-received transfer mail registered on the non-received transfer mail list 10 and the present date and time, and the execution of retransfer is reported to the last transferring person.
